

PTFE GASKET

Composition		100% PTFE
Colour		White
Tensile Strength	DIN	29 N/mm ²
Density	DIN	0.9 g/ cc
Compressibility	ASTM F36	45%
Recovery	ASTM F36	14%
Max. Pressure		200 bar
Max. Temp.		270 C
Friction Coefficient		0.041
Thermal of thermal conductivity		0.256

PTFE Gasket

PTFE Gasket

PTFE Gasket are made of suspension polymerization PTFE resin. It has outstanding comprehensive performance such as as high and low temperature resistance, corrosion resistance, climate resistance, insulation resistance, high lubricating, stick resistance, no toxic

Service:

PTFE Gasket is widely to use in the pipe line flange in the Chemical industrial, Pretroleum, Pharmaceutical, food etc.
