

PTFE JOINT SEALANT

Advantage

- Easy to install

- Easy to remove

- No scraping

- High compressibility

- No re-torque

- Fill flange irregularities

- No cutting of gasket rings

- No creeping

- No wastage

- Non Toxic

PTFE Joint sealant

PTFE Joint Sealant

It is expanded structure with an adhesives atripe facilities its assembling. Itresists to chemical agents except for molted or in solution alkaline metals and fluorine at high temperature.

Service:

The usage temparature is from -200 C to 260 C and the pressure can be up to 200 bar. It is corrosion resistance from most chemical material under the environment with PH 0-14.
